Shareholder Update

EnviroMission Limited (“The company”) is pleased to share with Shareholders that the company has signed a mutual non-disclosure agreement to facilitate continued negotiations with Solarino Graphene PVT LTD, of Pune, Maharashtra, India, following a productive meeting between the parties in San Francisco, USA.

From left to right: Mr Christopher Robling - Principal & Founder Clearspan Strategic LLC, Illinois, USA | Mr Jayat Pawar - Chairman, Solarino Graphene, Pune, India | Mr Pierre Koshakji - Executive Chairman, EnviroMission, Texas, USA | Dr Ilan Kuppusamy - CEO, Managing Director, Solarino Graphene, Bangalore, India

The company recognises that forecasted construction costs are a potential barrier for SCT deployment, however, Graphene has been identified as significantly increasing concretes durability whilst affording lighter loads and providing greater tensile resistance, all of which, increase the projects longevity, viability and commerciality. The company remains committed to building the safest and most stable structure, using materials uniquely optimised for SCT development.

Solarino Graphene, India's leading producer, is one of the largest producers in the world. Its proprietary manufacturing process has been refined over more than 25 years of its continuous production for global clients. Its graphene is noted for purity, stability, and consistency.

Solarino Graphene is led by Dr. Ilan Kuppusamy, CEO and Managing Director, of Bangalore, India, and Mr. Jayat Pawar, Chairman, of Pune, India.

See: www.solarinographene.com

"Graphene possesses extraordinary capabilities and applications. One example is increasing the strength of building materials upon which SCT will rely. We are vitally interested in pursuing improved structural resilience through increasing compressive and tensile strength of concrete," Pierre Koshakji, Executive Chairman, EnviroMission Limited, said.

The company will provide further company news updates as they materialise.

Ends.
